Customized vacuum lift systems

Lift anything from toilet seats, multiple buckets and oddly formed glass objects to car rims and small parts. TAWI's versatile vacuum lifters makes it possible to lift almost any kind of load, safely and ergonomically. Customized solutions mean that we develop and design our solutions based on your business needs. Together we find the right lift system for your operations.

Lifting solution tailored to your business needs

Handle any kind of load from car rims to bath tubs

Future proof your employees with improved ergonomics

Increase business productivity and efficiency

Lift, move, tilt and turn your goods effortlessly

Optimize your work flow

Product Details

VM30 [VM100]*

Our customized lifters are commonly based on the [TAWI Multifunctional lifter](https://www.tawi.com/products/vacuum-lifters/multifunctional-lifter/) (<https://www.tawi.com/products/vacuum-lifters/multifunctional-lifter/>), available in 9 standard models with maximum capacity ranging from 30-270 kilos. Our engineers will customize the lifter to meet your specific needs.

**TAWI vacuum lifters have new model names from March 2018, old names in brackets.*
